# EQUIPIC

Privately owned ASIC supply chain provider since 2002 with a broad network of partners. **Vendors' independent company**

ISO 9001 certified and co-operating with similarly certified partners

Led by professionals with solid knowhow of the chip industry, technology, IP and IC supply chain

Flexible ASIC service: full turnkey or modular support depending on your requirements

[www.equipic.com](http://www.equipic.com)

## We assess and customize to your needs

Tailormade solutions from chip design and floor planning and prototyping up to package level testing and mass production. We help you select the right technology for your design and do support low and high volume projects

## We offer real-world, hands-on expertise

Design methodology is not just about chip design, but also considers the way the chip interconnects with the package, how the package influences the system and how IP can best be integrated. We guide you to make the right choices and decisions to reduce your risks

## We serve different market segments

We are doing multiple tape-outs per year addressing different markets, ranging from consumer to industrial, automotive and medical. We understand the quality requirements of each of these segments and do support long lifetime products

## WITH OUR PARTNERS WE CAN OFFER

- IC design and layout support
- IP solutions (incl memory, PLL, DAC/ADC, Hi-speed interfaces)
- Legacy up to advanced specialty and deep submicron technology (~0.35um - 7nm) at multiple foundries (CMOS, RF, SiGe, SOI, Power, eNVM, MEMS, Photonics)
- Foundry management incl MPW/Prototyping/MLR, wafer procurement, yield monitoring and production control, FA, logistics
- Multi-Chip Module Solutions
- Bumping/Flip Chip services
- Wide variety of standard & advanced packaging (incl. SiP, 3D, TSV) & parallel testing solutions incl Flash & RF at competitive prices
- Innovative low cost tester solution for high volume production
